

## ABOUT ME

I am a Computer Science and Artificial Intelligence student with a strong interest in AI chatbots, call automation, AI agents, and digital content creation. I have experience with Python, AI chatbot builders, Canva design, and machine learning projects. I am seeking an AI Internship where I can contribute to chatbot development, AI automation solutions, voice agents, and e-book/template design while expanding my practical skills.

## CONTACT

- mahisocial10@gmail.com
- Block C1 Johar Town Lahore

## EDUCATION

### BACHELOR OF COMPUTER SCIENCE & ARTIFICIAL INTELLIGENCE

- Agriculture University (2yrs)

### I.C.S

- ILM COLLEGE GUJRAT  
2022-2024

### MATRIC

- PROGRESSIVE PUBLIC SCHOOL  
KUNJAH (2021)

## SKILLS

### Technical Skills

- AI Chatbot Development
- AI Call Automation & Voice Agents
- Python Programming
- Prompt Engineering
- Machine Learning Fundamentals
- Canva E-book & Template Design
- HTML, C++
- Microsoft Office & Google Workspace
- AI Website Builders

### Soft Skills

- Multi-Tasking
- Problem Solving
- Time Management

# MAHIM ANSAR

## AI AUTOMATION & DESIGN LEARNER

## WORK EXPERIENCE

- Gained hands-on experience with AI chatbot platforms, voice automation tools, prompt engineering, and workflow design.
- AI Tools Section(AI Chatbot Builders,Voice AI Platforms)
- Worked on property research and due diligence tasks, including collecting information, checking details, and preparing simple reports.
- Designed e-books, templates, social media content, logos, and marketing materials using Canva and AI-powered design tools.
- Used Microsoft Office and Google Workspace for documentation, data entry, and organizing information.
- Worked as a tutor for Computer Science and Mathematics, helping students understand difficult topics in a simple way.

## PROJECTS

### • AI Customer Support Chatbot

Built an AI chatbot capable of answering customer queries and providing automated responses.Improved understanding of AI automation and user interaction design.

### • LED Flasher Circuit

Designed and implemented an LED flasher circuit using digital logic design concepts. This project improved my understanding of digital electronics and circuit development.

## ACHIEVEMENTS

- Earned a certificate for completing the Circuit Craft Digital Logic Design Project.
- Received a certificate for developing a Machine Learning Driver Drowsiness Detection System.
- Awarded a certificate of appreciation as an Event Coordinator for helping organize the Sports Gala at PMAS-Arid Agriculture University in collaboration with the Higher Education Commission.
